

KEY TECHNOLOGIES

The Basse-Normandie region has the corporate facilities to meet your needs when installing new companies in the region. A full range of services is available for companies of all sizes, from the small start-up to the major corporations: business incubators, corporate office estates, business parks, technology centres, and more.

Adria Normandie

Several sites dedicated to companies whose business involves key technologies are described on the next page (see map).

You will find the real estate offering, all the available services, the companies based at the site, and training organisations for the sites that all boast a quality environment.

Citis-Hérouville (14)

There are also other regional sites with corporate facilities. Look up the development agencies (names, addresses and numbers in the Project Follow-up File) to find out about the available opportunities.

Normandia - Colombelles (14)

SOME OF OUR BUSINESS PARKS...

PRODUITS MER : Cherbourg (50)

Roughly 20 acres dedicated to hosting companies working in the sea product business.

- . An available site (a fish nobbing, processing, smoking and packaging plant)
- . A Technical Centre of the Sea (business incubator, usual utilities, cold +)
- . The Dielen laboratory specialising in nutritional supplements from fish hydrolisats

CITIS AND ACTIS : HÉROUVILLE AND CAEN (14)

A strategic location in a corporate environment with advanced laboratories – the heart of the Caen-Normandy Technopole.

Citis and Actis are at the interface if a breeding ground of performing companies and a huge university complex:

- ▶ Electronics and artificial intelligence
- ▶ Materials physics and new materials
- ▶ Bio-medicine and bio-pharmaceutics
- ▶ Plant and animal biology applied to agribusiness

NORMANDIAL : CAEN (COLOMBELLES 14)

A 100-acre complex dedicated to agribusiness companies.

Thanks to the innovative design of the complex, industrialists can outsource storage, cold logistics, and energy production (such as positive and negative cold, steam, compressed air, and water treatments).

They can also enjoy on-site, pooled services (guard service, maintenance, and so on). The technical requisites of 'clean and safe' plants are applied to all the facilities.

© Cartography : Normandie Développement - November 2001

L'ADRIA NORMANDIE : SAINT-LÔ (50)

A regional agribusiness hub:

- ▶ A service and international watch centre for the agrobio industry (science and technology, marketing, and regulations)
- ▶ Two efficient tools: Ialine (database) and Forum de l'Innovation (international watch for new products)
- ▶ Three expert services (watch, marketing advisory consulting, and technology transfer).

A corporate user site: 37 acres at Guilberville (50)

THE PLASTIC PROCESSING HUB : ALENÇON (61)

The city of Alençon has become a centre of excellence in the processing of plastics thanks to the skills and expertise available at ISPA (*Institut Supérieur de Plasturgie d'Alençon*, the Alençon higher institute of plastic processing). ISPA is a standard-setter, a centre of advanced technology, and a meeting place for the profession. Accordingly, the training programmes it offers meet the needs of plastic processing companies.

A corporate user site: 55 acres at the Arçonnay (61) business park
